

## SendGrid Integration with python

Date	17 November 2022
Team Id	PNT2022TMID47819
Project Name	Smart Fashion Recommender Application

The screenshot shows the Twilio console interface. At the top, the browser address bar displays 'console.twilio.com/?frameUrl=%2Fconsole%3Ftarget-region%3Dus1'. The Twilio header includes the user's name 'Ramesh', account status 'My first Twilio account', and a trial balance of '\$15.50'. The main content area is titled 'Ahoy Ramesh, welcome to Twilio!'. It features three primary action cards: 'Connect to 3rd-party applications' (listing requirements like Account SID and Auth token, Twilio phone number, and an upgraded account, with a 'Get a trial phone number' button and a link to the 'Read 3rd-party integration FAQ'), 'Invite teammates' (with an 'Invite teammates' button), and 'Talk to Sales' (with a 'Talk to Sales' button). A sidebar on the left contains navigation links for 'Develop' and 'Monitor', with 'Develop' selected. Under 'Develop', there are links for 'Phone Numbers', 'Verify', 'Studio', 'Messaging', and 'Voice'. Below these are links for 'Explore Products' and 'Docs and Support'. An illustration of two people stacking blocks is positioned between the 'Connect to 3rd-party applications' and 'Talk to Sales' cards.
