Project Design Phase-I
Proposed Solution

Date	19 September 2022
Team ID	PNT2022TMID47819
Project Name	Smart Fashion Recommender Application
Maximum Marks	2 Marks

Proposed Solution :

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	There is lot of time occurs while the customer is searching for the dress that fits them. Some of them doesn't know the color combination
2.	Idea / Solution description	We can automate the procedure like based on customer choice we can recommend the dress collection
3.	Novelty / Uniqueness	The customer will talk to Chat Bot regarding the Products. Get the recommendations based on information provided by the user
4.	Social Impact / Customer Satisfaction	Chat bot will act based on customers current mood it will create new words to make the customer feel happy to purchase some other.
5.	Business Model (Revenue Model)	The recommendation system will create new selling opportunities. It will reduce the labor cost. There will be good understanding with the Customers and chatbot.
6.	Scalability of the Solution	The customer size can increase but it can split the customers based on age, size and modern dress.
